EXAMINER'S AMENDMENT

a. **Amendment to the Specification:**

Specification filed on 10/23/2003, on paragraph [0018], delete "with an attorney docket number P157-US" and insert –Now Patent No. 6, 862, 727--.

Specification filed on 02/09/2004, after "Serial no. 09/938, 789," insert –
Now Patent No. 6, 678, 876,--.

8. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Allowable Subject Matter

9. Claims 2, 3, 6-11, 18, 21, 44, 48, and 55-58 are allowed.
10. The following is an examiner's statement of reasons for allowance: Claims 2, 3, 6-11, 18, 21, 44, 48, and 55-58 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination

disclose or suggest the combination of limitations specified in the independent claims, specifically "means for applying forces to ones of said nodes, wherein a magnitude of one of said forces applied to one of said nodes is proportional to a proximity of said one of said nodes to one of said obstacles; means for moving within said proposed physical layout each of said ones of said nodes in accordance with said forces applied to said one of said nodes" as disclosed in independent claims 2 and 18 of the instant application (as defined at paragraphs [0050], [0051], [0053]-[0056], [0059]-[0061] and [0064]-[0065] of the specification).

The prior art of reference Vaughn et al (Publication No. 2001/0038612) teaches the method of automatic routing system for circuit layout.

The prior art of reference Kikuchi et al (Patent No. 6, 385, 758) teaches the method of a limit movable distance within which one of the adjacent component terminals is allowed to move towards the other adjacent component terminal with a routing zone, calculation is made of the limit movable distance within which one node is movable towards the other node in moving direction via the routing zone.

However, the cited prior art taken alone or in combination fail to teach the combination of limitations, specifically the limitation of "means for applying forces to ones of said nodes, wherein a magnitude of one of said forces applied to one of said nodes is proportional to a proximity of said one of said nodes to one of said obstacles; means for moving within said proposed physical layout each of said ones of said nodes in accordance with said forces applied to said one of said nodes" as recited in claims 2

and 18, and as pointed out by the applicant's pre-appeal brief (pg. 4 paragraph five and pg. 5 paragraph two) filed on 01/07/2010.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
